Claims 1-22 recite, inter alia, a method for fabricating a plasma probe, comprising forming a plurality of second conductive structures on said dielectric layer, each second conductive structure of said plurality of second conductive structures corresponding to a first conductive structure of said first plurality of conductive structures; orienting said plurality of first conductive structures over corresponding ones of said plurality of second conductive structures, said plurality of first conductive structures and said plurality of second conductive structures both being secured to said dielectric film.

The art of record does not disclose the above limitations, nor would it be obvious to modify the art of record so as to include the above limitations.
